Career Objective

Passionate and creative **Web Developer & Graphic Designer** seeking an opportunity to combine technical expertise and artistic vision to craft engaging digital experiences. Eager to contribute fresh ideas, modern design principles, and front-end development skills to a dynamic and growth-oriented team.

Profile Summary

A motivated hybrid professional with a foundation in **Computer Engineering** and hands-on experience building websites and visual assets for clients. Skilled in combining user-centered design, responsive web technologies, and modern branding concepts to deliver projects that balance creativity and functionality. Proficient with both front-end frameworks and visual design tools.

Technical Skills

Programming & Development: JavaScript, Python, HTML5, CSS3 **Frameworks & Libraries:** React.js, Bootstrap **Design Tools:** Adobe Photoshop, Figma, Canva **Web Tools:** Git, Visual Studio Code **Other Skills:** UI/UX Design, Responsive Layouts, Color Theory, Branding, Communication

Professional Experience

Freelance Web Developer & Graphic Designer

Chitwan — 2023–Present

Developed responsive and visually appealing websites for local clients, focusing on usability and modern web standards. Created branding materials including logos, banners, and social media content using Adobe Photoshop and Canva. Worked closely with clients to translate design concepts into functional web pages and interfaces. Implemented website optimization practices for faster load times and improved SEO performance.

Highlighted Projects

E-Commerce Website – Built a modern e-commerce platform with product listings, cart functionality, and responsive UI using React and CSS. **Portfolio Website** – Designed and developed a personal portfolio showcasing design work, project gallery, and contact integration. **Brand Identity Kit** – Designed custom logos, posters, and banners for a startup, ensuring consistent color palette and typography. **Plant Disease Detection System (Frontend)** – Developed an interactive React-based dashboard for visualizing predictions from a machine learning model, featuring clean UI, image upload interface, and responsive design. **Finance Literacy Project (Frontend)** – Created a user-friendly web interface to display educational financial content and charts, emphasizing accessibility and visual clarity for non-technical users. **Restaurant Landing Page** – Created a stylish landing page with animations and booking integration to enhance client's brand presence online.
